EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT) Hyderabad, Telangana

B.E. Information Technology Expected Graduation: May 2028

- **Relevant Coursework:** Cryptography, Computer Networks, Operating Systems, Data Structures & Algorithms, DBMS, Object-Oriented Programming, Exploratory Data Analysis & Visualization.
-

TECHNICAL SKILLS

Programming & Scripting: Python, C++, Java, C, JavaScript, Node.js.

Cybersecurity: Cryptography, Security Fundamentals, Threat Analysis, Phishing Detection, Secret Detection.

Security & Automation: Git Hooks, Regex, Python Automation, Security Analytics.

Data & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLP

Systems: Computer Networks, Operating Systems, Linux/Unix

Tools: Git, GitHub, SQL, DBMS, Streamlit

EXPERIENCE

Defence Space Summer Intern

[Certificate](#)

BSERC | Remote | June 2026 – July 2026

- Selected for a competitive 6-week program spanning AI, cybersecurity, UAV technologies, and autonomous defense-space applications.
- Developed **SCOPE**, an AI-driven intelligence and threat analysis dashboard capstone using machine learning and interactive data visualization.
- Applied Generative AI and LLMs to design predictive threat analysis frameworks for secure defense system architecture

AI and Machine Learning Intern

[Certificate](#)

Indian Institute of Computing and Technology (IICT) | Remote | June 2026 – July 2026

- Developed an **NLP-based fake-news detection system**, applying text preprocessing and machine-learning techniques to classify news content.
 - Performed data preprocessing and model evaluation to improve the reliability of automated text classification.
 - Documented experimentation and implementation details throughout the development process
-

PROJECTS

Phishing Email Detection & Explainability

[GitHub](#) | [Live App](#)

Python, Scikit-learn, Pandas, NLP, Streamlit

- Trained and evaluated multiple classification models on **82,077 training emails**, achieving **97.8% accuracy** with HistGradientBoosting.
- Reduced missed phishing emails to approximately **0.9% false negatives**, with 78 phishing emails missed out of 8,569 phishing samples.
- Built an **explainability interface using Streamlit**, enabling users to inspect model-driven phishing detection results.

SecretSentinel - Developer Security Operations CLI

[GitHub](#) | [Demo Video](#)

Node.js, Git, Regex

- Built a lightweight **DevSecOps CLI** that scans Git-staged files for exposed credentials before commits, helping prevent accidental secret leakage.
 - Implemented **regex-based detection** for AWS keys, GitHub tokens, and generic API keys across staged file contents.
 - Integrated the scanner with a **Git pre-commit hook** to automatically inspect files and report the detected secret type, file, and line number.
 - Implemented a failsafe that **blocks commits containing detected secrets**, preventing potentially sensitive information from entering the codebase.
-

CERTIFICATES

Google Data Analytics Professional Certificate

2026 Coursera

Applied AI & Agent Development

2025 CSRBOX, IBM SkillsBuild
